

TB-55 Locating Accessories Inside the Toilet Partition

Partition-Mounted Accessories

2010 and 2009 ICC/ANSI Standards:

In partitions designed to accommodate wheelchairs, accessories should be mounted so the operating features meet local or state building codes or federal law whichever applies.

Roll toilet tissue dispensers that do not control delivery or do not allow continuous paper flow are required in all accessible toilet compartments. The 2010 ADA Standards require that roll toilet tissue dispensers must be installed with the dispenser centerline 7 inches (180mm) minimum and 9 inches maximum in front of the leading edge of the toilet. The 2009 ICC/ANSI Standards establish a different measurement procedure, locating the dispensers between 24 inches minimum and 42 inches maximum from the rear wall of the toilet compartment. The 2009 ICC/ANSI Standards locate the outlet of the dispenser no lower than 18 inches above the finish floor. The 2010 ADA Standards allow the outlet on the roll toilet tissue dispenser to be mounted as low as 15 inches above the finish floor.

Sanitary napkin disposals are recommended in all women's toilet compartments. They should be within reach from a sitting position, and it is recommended that they be mounted below grab bars.

Toilet seat cover dispensers are an optional hygienic amenity that can easily be provided in all toilet compartments. The opening for toilet seat covers needs to be mounted between 15 inches and 48 inches above the floor, in an accessible location in the accessible compartment, typically away from the vicinity of the toilet itself.

Combination units can organize and unify installations by incorporating several accessories at one convenient location, such as toilet tissue dispensers, toilet-seat-cover dispensers, and sanitary napkin disposals. Recessed units should be installed in side walls or partitions with grab bars. Note that recessed units are allowed to project only 1/4 inch.

Bobrick recommends installing a B-687 bumper to prevent impact of an inswing door with partition-mounted accessories. The B-687 bumper has a cushioned tip that projects 2" (50mm) and a stainless steel base with satin finish to match Bobrick toilet compartment hardware. This bumper can also be used to protect finished walls from outswing doors on barrier-free corner or alcove compartments.

Bobrick Standard Partition-Mounted Accessories:

Accessories in a toilet partition should be positioned to be within easy reach from the toilet. All accessories should be accessible on a side wall or partition.

Bobrick will provide cutouts for partition-mounted accessories in toilet partition panels as follows:

Bobrick's standard cutouts (Cutout location on page 2):

Cutouts are positioned to accommodate toilet bowls projecting from rear of the wall 29" to 31" (735 to 790mm) to meet 2010 ADA and 2009 ICC/ANSI Standards for roll toilet tissue dispensers.

- Any toilet bowls out of the standard range will not meet accessibility standards and will be considered a special accessory cutout.
- Specifying the cutout location and dimensions is the responsibility of the architect and designer. Please review 2010 ADA and 2009 ICC/ANSI Standards and your local building codes for product placement.

Special Accessory Cutouts (Use Template on Page 3 to order special cutouts):

Advise Customer Service prior to order placement when there are special cutouts required. The following conditions will require special cutouts:

- Accessory position shown on page 2 is not the desired location
- Toilet bowl sizes are not within 29" to 31" (735 to 790mm) range
- Cutouts are for non-Bobrick or Gamco partition-mounted units

Cutout fee for standard and special cutouts:

- \$25.00 for each partition-mounted accessories

Setup fee:

- No fee for Bobrick or Gamco standard cutouts (See page 2)
- \$150.00 for:
 - o Competitors' partition-mounted accessories
 - o Special accessory cutout position is requested

Standard Position of Cutouts in Panel for Bobrick Partition Mounted Accessories

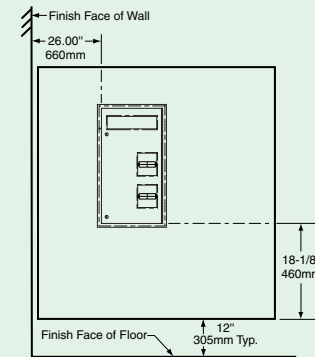

Designer's Notes:

1. Illustrations, dimensions and applications shown are advisory only; all installations must conform to local codes. *Advise customer service when different location is preferred.*
2. Bobrick standard cutouts will be positioned to accommodate toilet bowl sizes ranging from 29" to 31" (737 to 790mm) to meet code for all toilet tissue dispensers. Cutout for B-386, B-3471, B-3571, B-34715, B-35715 are affected.
3. Dimensions shown to finished wall include a nominal 1/2" (13mm) wall gap.
4. This symbol identifies accessory layout that would comply with accessibility standards and permit the use of grab bars at approximately 33" (840mm) above the floor. Grab bars selected should be evaluated for placement of intermediate supports. Bobrick grab bars that can be used with these partition layouts: B-5837, B-58616, B-68137, B-6861, B-68616, and all straight grab bars 42" (610mm) or longer.
5. Units B-3471, B-3571, B-34715, and B-35715 have one side flush against partition to allow clearance for a grab bar across front of unit in one partition. Consult local codes for toilet partition clearance requirements.

Drawings are not to scale.
